Herculaneum, Missouri • Community Advisory Group Meeting

September 16, 2003
Bruce Morrison, EPA, Toll Free # 1-800-223-0425
Jim Silver, EPA (936) 475-3926

Cleanup Progress

- 200 yards completed.
- 90 home interiors cleaned.
- 100 vacuums distributed by EPA.

Property Access from Owners

- EPA encourages owner access for sampling, yard soil replacement, and interior cleaning.
- Soil replacement and interior cleaning are measures that will reduce the potential for exposure to lead dust.
- EPA offering to sample home interiors where homeowners are refusing interior cleaning.

Materials Handling and Transportation

- EPA approved revised Plan on July 8.
- As of October 1, 2003, all concentrate delivery trucks will be rerouted through the facility and washed prior to exiting property.
- Additional measures to seal concentrate truck tailgates will be implemented.
- Green zone performance measure for lead dust required to be equivalent to non-haul route streets in Herculaneum.

Slag Pile

- EPA and MDNR are in negotiations with Doe Run to accelerate time table for completing Engineering Evaluation/Cost Analysis (EE/CA).

Home Interior Focus Group

- Draft recommendations were received July 21.
- Comments were received early August.
- Meeting Scheduled for September 22, 2003.
- ATSDR Health Consultation will be requested on final recommendations.

Lead Contamination Disclosure

- 40 CFR Part 745
- Property owner required to provide records of sampling data for property to prospective buyer.
- If homeowner is not in possession of sampling data, they must tell buyer that EPA has the records of the data.
